

3 steps to login to SQL Developer on Campus

Step1

Step2

Step 3

How to run a script file to create a schema

Download script files (Hotel_DB.sql) and (HR_LDD.sql) from your AUTOonline account “Course Notes\Week1\Labs\” to a folder in your Home drive. To run the code of Hotel_DB.sql and HR_LDD.sql files in your local database account use the @ symbol followed by the location path and file name. For help, follow the example below:

```
SQL>@path-of-the-folder-on-your-home-drive\ HR_LDD.sql;
```

```
SQL>@path-of-the-folder-on-your-home-drive\ Hotel_DB.sql;
```

Creation of SQL*Plus demonstration tables

To create the SQL*Plus demonstration tables (EMP, DEPT, etc.) in the current schema you need to download “demobld” script file from the course page (given under first lab) and run that script file using the procedure described above.
